## Cheese Prices Up, but Butter Price Down

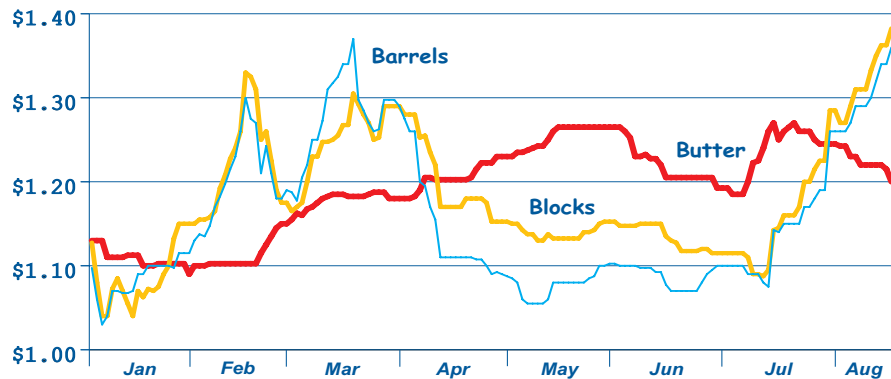

Prices for cheddar cheese on the Chicago Mercantile Exchange (CME) increased more than 20¢ from mid-July to mid-August. The butter price on the CME was down 5¢.

The CME barrel price on August 18 was \$1.36 per pound, up 22¢ from July 17, while the 40-pound block price of \$1.38¼ per pound was up 23¾¢ from mid-July. Barrel and block prices, however, are more than 30¢ below year-earlier levels.

The CME butter price on August 18 was \$1.20 per pound, down 5¢ from July 17. Butter prices for the year have moved in a narrow range, generally, between \$1.10 and \$1.27, as can be seen in the graph below. The year-earlier level for the CME butter was about \$1.65, more than 40¢ above the current level.

The July Federal order Class III price was \$9.97 per cwt., unchanged from June, but \$8.27 below July 2008.

\* Prices depicted are per pound for each day in 2009 that trading occurred through August 18.

## Pool Summary

- In July, producer milk totaled a new record high 2.92 billion pounds, up 159 million pounds from June, and 534 million pounds above July 2008.
- Class I utilization totaled 360 million pounds, up 2% on a daily basis from June. Class I usage accounted for 12.3% of producer milk.
- Class III utilization totaled 2.5 billion pounds and accounted for 84.3% of producer milk.
- The July Producer Price Differential (PPD) is \$0.33 per cwt.
- The Statistical Uniform Price is \$10.30 per cwt., up \$0.01 from June, but \$8.60 below July 2008.
- Market statistics for July are shown on Pages 4 and 5.

## Supply Plant Systems

Supply plants are defined in §1030.6, with performance requirements defined in §1030.7(c). In general, supply plants are required to ship 10% of their receipts to bottling plants.

These performance requirements can be met as a “system”, as defined in §1030.7(f).

This provision allows two or more supply plants operated by one or more handlers to qualify for pooling by meeting the shipping requirements in the same manner as a single plant. In other words, an individual plant in a system does not need to qualify on its own, as long as the system as a whole qualifies.

Supply plants in a system generally must be located in the marketing area.

The following supply plants requested system pooling for the period of August 2009 through July 2010.

## USDA Raises Dairy Support Prices \*

On July 31, Agriculture Secretary Tom Vilsack announced a temporary increase in the amount paid for dairy products through the Dairy Product Price Support Program (DPPSP) from August 2009 through October 2009.

The increase will raise the prices paid for nonfat dry milk (NDM) and cheddar cheese as shown in Table 1 below. According to USDA estimates, these increases will boost dairy farmers' revenue by \$243 million.

USDA estimates that the increase will raise the all-milk price received by dairy producers and result in the government purchase of an additional 150 million pounds of NDM and an additional 75 million pounds of cheese.

Prior to this announcement, USDA had taken steps to provide support for dairy farmers, including the following:

- In March, USDA transferred approximately 200 million pounds of NDM to USDA's Food and Nutrition Service for domestic

feeding programs, which not only removes inventory from the market, but also supports low-income families.

- In addition to the 200 million pounds above, USDA also made NDM available as follows:

- ◆ At least 1 million pounds on a competitive basis, for the production of casein;
- ◆ About 500,000 pounds for use in the McGovern-Dole International Food for Education and Child Nutrition Program; and
- ◆ About 1 million pounds for use by the U.S. Agency for International Development, based on anticipated requests from the State Department.

- USDA expects to spend more than \$1 billion in fiscal year 2009 on purchases of dairy products through DPPSP and payments to producers through the Milk Income Loss Contract program.

- On May 22, USDA reactivated the Dairy Export Incentive Program (DEIP) to help U.S. dairy exporters meet prevailing world prices and develop international export markets in areas where U.S. dairy products are not competitive due to subsidized dairy products from other countries.

Under U.S. World Trade Organization (WTO) commitments, USDA is allowed to provide bonuses for dairy products on a July through June yearly basis of 68,201 metric tons of NDM; 21,097 metric tons of butterfat; 3,030 metric tons of various cheeses, and 34 metric tons of other dairy products.

- USDA is currently reviewing Federal dairy policy to determine what changes are needed to reduce price volatility and enhance farmer profitability.
