## New Dairy Economic Loss Assistance Payment Program \*

Agriculture Secretary Tom Vilsack recently announced the implementation of the new Dairy Economic Loss Assistance Payment (DELAP) program. The 2010 Agricultural Appropriations Bill authorized \$290 million for loss assistance payments to eligible dairy producers.

Eligible producers will receive a one-time direct payment based on the amount of milk both produced and commercially marketed by their operation during the months of February through July 2009. Production information from these months will be used to estimate a full year's production for an operation to calculate the payments, using a 6-million pound per dairy operation limit.

Dairy producers who have production records at the USDA Farm Service Agency

(FSA) county office because they participated in another FSA dairy program do not need to apply for the program. FSA will use existing production records for February through July 2009 to calculate and issue their payments.

Producers who have not provided production data for those months to FSA, and have not already been contacted by FSA to provide such data, have 30 days, until January 19, 2010, to apply. FSA officials estimate that more than 95 percent of eligible producers will receive benefits without having to fill out a new application.

A national per hundred weight payment rate will be determined by dividing the available

## Pool Summary

- In November, producer milk totaled 2.42 billion pounds, down 329 million pounds from October, and 204 million pounds below November 2008.
- Class I utilization totaled 364 million pounds, down 4% on a daily basis from October. Class I usage accounted for 15.0% of producer milk.
- Class III utilization totaled 1.8 billion pounds and accounted for 76.3% of producer milk.
- The November Producer Price Differential (PPD) is \$0.04 per cwt.
- The Statistical Uniform Price is \$14.12 per cwt., up \$1.18 from October, but \$1.73 below November 2008.
- Market statistics for November are shown on Pages 4 and 5.

funding of \$290 million, less a reserve established by FSA, by the total pounds of eligible milk production approved for payment. Based on current information, FSA estimates that 875 million cwt. of milk production will be eligible for payment. The reserve will cover new applicants and appeals. The expected payment rate is approximately \$0.32 per cwt.

To be eligible for DELAP, the dairy producer and the dairy operation in

which the producer has a share:

- ◆ Must have produced milk in the United States and marketed milk commercially at any time from February through July 2009;
- ◆ Must have milk production data for those months; and
- ◆ Must certify to all milk production produced and marketed by the dairy operation during that time.

Also, any dairy producer who has an annual average adjusted gross nonfarm income of more than \$500,000 for calendar years 2006 through 2008 is not eligible for DELAP.

For more information and eligibility requirements on the new DELAP program, please visit your local FSA county office or [www.fsa.usda.gov](http://www.fsa.usda.gov).

## Summary of Grade A Milk Percentages by State

The table below contains historical data of Grade A milk production as a percentage of total milk production for selected states and selected years from 1970 through 2008.

For 2008, the milk sold to plants and dealers in the United States was 99% Grade A milk, up one percentage point

from 2005. That percentage increased 25 percentage points from 74% in 1970.

Reflecting the national trend, the Grade A milk produced in five of the seven states in the Upper Midwest Order, as a percentage of total milk production, also increased one to three percentage points

from 2005. That percentage also significantly increased in all of the states composing the Upper Midwest Order during the 38-year period.

North Dakota is the only remaining state with Grade A milk production less than 85% of total production.
