## Electronic Dairy Product Reporting

The U.S. Department of Agriculture recently issued a proposed rule to amend the Dairy Product Mandatory Reporting Program as required by law.

The Mandatory Price Reporting Act of 2010 amends the Agricultural Marketing Act of 1946 to, among other things, provide for the establishment of an electronic reporting system for manufacturers to report sales information for specific dairy products.

The proposed rule will establish an electronic reporting system for dairy product sales information. It requires the Secretary to publish a report on Wednesday of each week of the information obtained for the previous week, transfers the data collection responsibilities from the National Agricultural Statistics Service to the Agricultural Marketing Service (AMS), and announces AMS' intention to request approval by the Office of Management and Budget of the associated information collection requirements.

Any manufacturer that processes and mar-

kets less than one million pounds of the specific dairy products per year would remain exempt from the reporting requirements. Price data reported are used by USDA to determine minimum class prices for raw milk under the Federal Milk Marketing Order Program.

The proposed rule was published in the *Federal Register* on June 10, 2011. Public comments must be received by August 9, 2011. Comments may be filed by visiting [www.regulations.gov](http://www.regulations.gov). USDA will issue a final rule implementing the program once public comments have been reviewed.

## Cheese Prices Rise, and Butter Steady

Prices for cheddar cheese on the Chicago Mercantile Exchange (CME) were at three-year highs after rising sharply from mid-May to mid-June, while the butter price rebounded after it had briefly dropped below \$2.00 per pound in the first half of May. Price changes are depicted in the graph below. The cheese prices increased more than 40¢ during that period, and the butter price rose more than 10¢.

The CME barrel cheddar cheese price on June 16 was \$2.07<sup>3</sup>/<sub>4</sub> per pound, up 43<sup>1</sup>/<sub>4</sub>¢ from May 16, and the 40-pound block price of \$2.11<sup>1</sup>/<sub>4</sub> per pound was up 48<sup>1</sup>/<sub>4</sub>¢. Barrel and block prices were 71<sup>1</sup>/<sub>4</sub>¢ above year-earlier levels.

The CME butter price on June 16 was \$2.14 per pound, up 14¢ from May 16, and 52¢ above a year ago.

The May Federal order Class III price was \$16.52 per cwt., down \$0.35 from April, but \$3.14 above May 2010. The June CME Class III futures price on June 16 closed at \$19.20 per cwt., with July through December dropping from \$20.09 to \$17.50. The future prices for the second half of the year average nearly \$18.50.

## 2010 Annual Dairy Products Summary

The National Agricultural Statistics Service (NASS) recently published the "Dairy Products 2010 Summary", which details the monthly production of specified dairy products in the United States.

The table on Page 3 shows annual production and number of plants manufacturing selected dairy products in the United States for 2010 and 2009. Selected items from the table are summarized below. A breakdown of the information by state is included in the report, which is available on the NASS website at:

[www.nass.usda.gov/Publications](http://www.nass.usda.gov/Publications)

**Butter** production in the United States

during 2010 totaled 1.6 billion pounds, 0.5% below 2009. California accounted for 36% of butter production in 2010.

**Total cheese** production in 2010, excluding cottage cheeses, was 10.4 billion pounds, 3.6% above 2009. Wisconsin was the leading cheese producing state with 25% of the production, followed by California with 21%, Idaho with 8%, New York and New Mexico with 7% each, and Minnesota with 6%.

**American type cheese** production was 4.3 billion pounds, 1.7% above 2009. American cheese accounted for 41% of total cheese production in 2010. Wisconsin was the leading American cheese producing state with 20% of the

production, followed by Idaho with 16% and California with 14%.

**Italian cheese varieties** production of 4.4 billion pounds in 2010 was 5.8% above 2009. Italian Cheese accounted for 42% of total cheese production in 2010. Mozzarella accounted for 79% of the Italian production, followed by Provolone with 8% and Ricotta with 6%. California was the leading Italian cheese producing state with 31% of the production, followed by Wisconsin with 29%.
