## California Federal Milk Order Goes Live

The California Milk Order, F.O. 51, was implemented on October 17, 2018, with the publication of the *Announcement of the Class I Price* for November 2018. However, the first release of the *Producer Price Differential* was on December 14, 2018.

While choosing permanent office locations and hiring the staff for F.O. 51 are underway, experienced personnel from the ten existing Federal milk orders can assist with questions that producers or handlers may have and a temporary office is located in Woodland, California.

If you have questions, please email them to:

[market.admin@cafmmo.com](mailto:market.admin@cafmmo.com)  
or call (530) 662-2037.

These price releases and other items related to the new order are available at: [www.cafmmo.com](http://www.cafmmo.com).

Happy  
New  
Year

## Notice on Dairy America Settlement

A settlement was recently reached in the Dairy America milk powder lawsuit. After obtaining approval from handlers to release their data, USDA provided the Claims Administrator (Rust Consulting) with pounds of milk pooled during the 64-month period of January 2002 through April 2007.

For the Upper Midwest Order, however, the only records available were for the 16-month period of January 2006 through April 2007. To fix this issue, the Claims Administrator has mailed revised Claim Forms to farmers

that pooled milk on the Upper Midwest Order. The new claim forms should show revised pounds that are approximately four times higher than the earlier form. In addition, if milk was pooled on another order, other forms may have been received.

The complete statement on the revised pounds is published on the case website at:

[milkpowdercase.com](http://milkpowdercase.com).

Producers are reminded that claim forms must be postmarked by **January 28, 2019**.

## Pool Summary

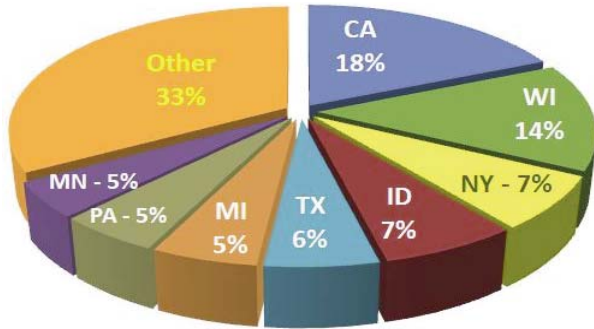

- In November, producer milk totaled 2.7 billion pounds, up from last month and last year, primarily because of a smaller estimated volume of milk not pooled.
- Class I utilization was 248 million pounds, up 3.5% on a daily basis from October, but 12% below last year. In November, Class I use accounted for 9.2% of producer milk.
- The November Producer Price Differential (PPD) was \$0.30 per cwt.
- The Statistical Uniform Price was \$14.74 per cwt., down \$1.01 from October and \$1.93 below last year.
- Market statistics for November are shown on Pages 4 and 5.

## CME Dairy Commodity Prices Up in December

The price for barrel cheddar cheese on the Chicago Mercantile Exchange (CME) on December 21 was \$1.29½ per pound, with 40-pound blocks at \$1.39.

The CME barrel price was up 5½¢ from the same time last month, but nearly 11¢ below a year ago. The CME block price was up 4½¢ from a month ago, but 5¼¢ below last year. The cheese prices have generally trended downward since the end of August this year, with a slight upturn in the last month, as seen in the graph below.

The spread between the block and barrel prices on December 21 was at 9½¢, again above the “normal” historical range of between 4¢ and 5¢. The spread has been outside of that range most of the year. The difference has averaged nearly 13¢ for the year, peaking at more than 30¢ in early October.

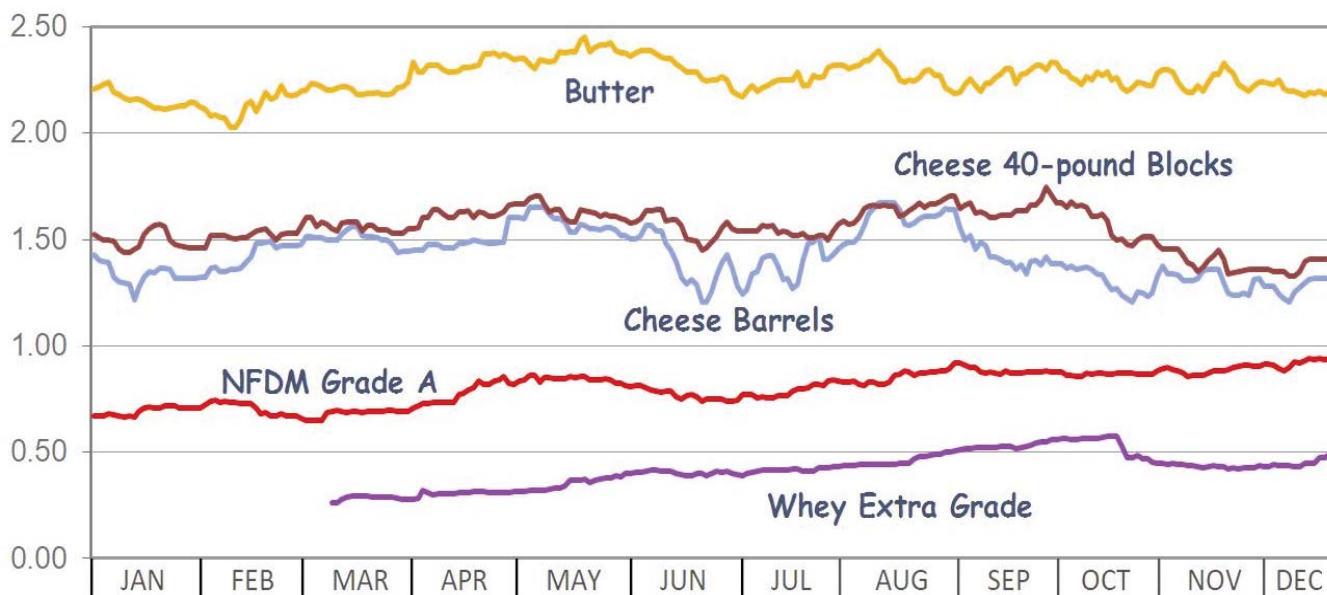

The CME butter price on December 21 was \$2.20½ per pound, down 7½¢ from last month, but 2½¢ above a year ago. The price has fluctuated in a range between about \$2.20 and \$2.35 per pound since mid-June this year.

The price of nonfat dry milk (NFDM) on the CME on December 21 was \$0.94 per pound, up 4¼¢ from last month and 28¢ above a year ago.

The November Federal order Class III price was \$14.44 per cwt., down \$1.09 from October and \$2.44 below last year.

The Class III futures on the CME on December 21 had the price at \$13.84 for December, \$14.28 for January, going back above \$15 in April, and topping \$16 in June.

## Fluid Milk Provided to Food Banks for the First Time

Fluid milk was distributed to food banks across the country for the first time under the Emergency Food Assistance Program (TEFAP).

The TEFAP is a Federal program, first authorized in 1981, that helps supplement the diets of low-income Americans, including elderly people,

by providing them with emergency food and nutrition assistance at no cost. It provides food and administrative funds to States to supplement the diets of these groups.

This past fall, 63 million pounds of milk were purchased to be distributed in 1,800 trucks for a value of \$20.14

million. This resulted in 14.6 million half gallons of milk going to those in need, or nearly 117 million glasses.
