Federal Milk Marketing Orders—Amending the Class I Skim Milk Price Formula

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends the Class I skim milk price formula for milk pooled under Federal milk marketing orders. Under the amended price formula, the Class I skim milk price will be the simple average of the two advanced pricing factors for Class III and Class IV skim milk, plus the applicable adjusted Class I differential. Section 1403(b)(2)(B) of the 2018 Farm Bill provides that the implementation of the regulations to amend the Class I skim milk price formula shall not be subject to the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553), the notice and hearing requirements of section 8c(3) of the Agricultural Adjustment Act (7 U.S.C. 608c(3)), the order amendment requirements of section 8c(17) of the Agricultural Adjustment Act (7 U.S.C. 608c(17)), nor a referendum under section 8c(19) of the same Act (7 U.S.C. 608c(19)). Additionally, this final rule must become effective on May 1, 2019, as

1 7 U.S.C. 601–674, 7253
During the same month, 301 handler plants were regulated by or reported their milk receipts to be pooled and priced under a FMMO. Of the total, AMS estimates approximately 163 handler plants, or 54 percent, would be considered small businesses. AMS does not expect the change in the Class I price formula to negatively impact small entities or impair their ability to compete in the marketplace.

The change in the Class I price formula applies uniformly to both large and small businesses. The dairy industry has calculated that applying the “higher of” provisions to skim milk prices has returned a price $0.74 per hundredweight above the average of the two factors since the pricing formulas were implemented in 2000. Thus, the inclusion of the $0.74 in the calculation should make the change roughly revenue neutral. At the same time, it is anticipated that using the average of the Class III and Class IV advanced pricing factors in the Class I skim milk price formula will allow handlers to better manage volatility in monthly Class I skim milk prices using Class III milk and Class IV milk futures and options. Until now, uncertainty about which Class price will end up being higher each month has made effective hedging difficult. Amending the Class I skim milk price provisions may help small businesses better utilize currently available risk management tools.

AMS is committed to complying with the E-Government Act, to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

A review of reporting requirements was completed under the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). This final rule will have no impact on reporting, recordkeeping, or compliance requirements under the FMMOs because there are no changes to the current requirements. No new forms are added, and no additional reporting requirements are necessary. This final rule does not require additional information collection beyond that currently approved by OMB for FMMOs (OMB Number 0581–0032—Report Forms Under the Federal Milk Marketing Order Program).

Airworthiness Directives; Bombardier, Inc., Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Bombardier, Inc., Model BD–700–1A10 and BD–700–1A11 airplanes. This AD was prompted by in-service findings that a cotter pin at the main fitting joint of the nose landing gear (NLG) retraction actuator to the NLG strut showed evidence of shearing after an NLG retraction-extension cycling. This AD requires revision of the existing maintenance or inspection program, as applicable, a general visual inspection for damage of a certain cotter pin present on certain configurations of the NLG strut assembly and for the
