Volume 1, Issue 9

Upper Midwest Marketing Area, Federal Order No. 30

October 2000

Special points of interest:

- September Producer Price Differential -- \$0.70 / cwt.
- September Statistical Uniform Price -- \$11.46 / cwt.

Producer Price Differential at 70¢

The producer price differential (PPD) for the Upper Midwest Order for September 2000 is 70¢ per cwt., down 14¢ from August. The resulting statistical uniform price of \$11.46 per cwt., however, is up 49¢ from August.

Producer milk in September

totaled 1.71 billion pounds, down 4.7% on a daily basis from August. During the month, 17,362 producers delivered to the market with an average daily delivery of 3,357 pounds.

Class I use in September totaled 345 million pounds, up 3.4% on a daily basis from

August. The increase resulted primarily from a seasonal rise in disposition of fluid milk products on routes. During the month, Class I usage accounted for 20.2% of producer milk.

Market statistics for September are shown on Pages 4 and 5.

Hauling Charges Studied

Milk hauling charges (to the first point of delivery) were examined for May 1999 for both the former Chicago Regional Milk Marketing Area, Federal Order 30, and the former Upper Midwest Marketing Area, Federal Order 68.

A staff paper for each of the marketing areas has been prepared and will be released in the near future.

Both papers will be available on our Web site at www.fmmampls.com. Copies will also be available by calling 888-301-8224 (toll free).

Hauling charges used in the studies were the deductions for hauling shown on producer payrolls submitted to the respective Market Administrators. Therefore, the charges do not necessarily

reflect the actual cost of the hauling.

Chicago Regional

The average hauling charge for producers participating in the former Chicago Regional Order in May 1999 was 11.1¢ per cwt.

For the states from which producer milk was received into the Chicago Regional market, hauling charges averaged 8.8¢ in Illinois, 9.5¢ in Iowa, 10.0¢ in Indiana, 11.2¢ in Wisconsin, 12.6¢ in Minnesota, and 15.8¢ in Michigan.

Hauling charges were noticeably higher in counties located outside fluid milk shed areas and in counties located farthest from major Class I fluid markets. In general the average per hundredweight

hauling charge decreased as the farm size increased.

Upper Midwest

The average hauling charge for producers participating in the former Upper Midwest Order in May 1999 was 20.8¢ per cwt., up from 17.6¢ for May 1998 and 17.7¢ for May 1997.

For the states from which producer milk was received into the market, hauling charges averaged 15.3¢ in Wisconsin, 19.6¢ in Iowa, 21.3¢ in Minnesota, 42.7¢ in South Dakota, and 55.5¢ in North Dakota.

The per hundredweight hauling charges in the Upper Midwest Order also generally declined as the volume of milk delivered per farm increased.

Members Named to National Dairy Board

The Secretary of Agriculture recently appointed ten new members and reappointed two incumbents to the National Dairy Promotion and Research Board. All will serve three-year terms beginning November 1, 2000. The list below shows the 36 members of the national board effective November 1, 2000. A map showing the 13 regions is shown on Page 3.

The National Dairy Promotion and Research Board, established by the Dairy and Tobacco Adjustment Act of 1983, administers a coordinated program of promotion, research and nutrition education. The board's activities are financed by a mandatory 15¢ per cwt. assessment on milk produced in the contiguous 48 states and marketed commercially by dairy farmers. USDA's Agriculture Marketing Service monitors the activities of the board.
