Producers Approve Amended Federal Orders

Producers supplying milk for each of the 11 Federal milk markets approved amending the Class III and Class IV pricing formulas under Federal milk orders on an interim basis. The interim amended orders became effective January 1, 2001.

This Interim Final Rule responded to a Congressional mandate to reconsider the Class III and Class IV pricing formulas included in the Final Rule for the consolidation and reform of Federal milk

orders. The mandate was included in the Consolidated Appropriations Act, 2000.

A more detailed description of changes to the formulas was contained in the December 2000 Upper Midwest Dairy News.

Interested persons have until February 5, 2001 to file comments in response to the Tentative Decision.

A Tentative Final Decision was issued because the

Congressional deadlines of December 1, 2000 for publication of a Final Decision and January 1, 2001 for effectuating order amendments did not allow enough time to issue a recommended decision and receive and consider comments before issuance of a final decision.

Copies of this rule and additional information can be accessed on USDA's web site at: www.ams.usda.gov/dairy.

Preliminary 2000 U.S. Milk Production Up 3.2%

Preliminary U.S. Department of Agriculture estimates indicate United States milk production for 2000 at a record high 168 billion pounds, up 3.2% from 1999.

The increase resulted from a 0.8% increase in the number of milk cows and a 2.4% gain in output per cow.

For the top five milk producing states, 2000 production,

compared to the previous year, was up 5.8% in California, 2.1% in Pennsylvania, 0.8% in Wisconsin, and 0.3% in Minnesota, but down 0.6% in New York.

Pool Summary

- In December, 15,978 producers delivered to the market with an average daily delivery of 3,416 pounds.
- Producer milk totaled 1.66 billion pounds, up 0.6% on a daily basis from November.
- Class I utilization totaled 338

million pounds, down 5.3% on a daily basis from November.

- Class I usage accounted for 20.4% of producer milk.
- The December Producer Price Differential is \$1.23 per cwt.
- The Statistical Uniform Price is \$10.60 per cwt.
- Market statistics for December are shown on Pages 4 and 5.

Recap of Federal Order Data for 2000

The table to the right and the map below summarize data for all Federal milk orders for 2000. Comparisons to data for previous years are not made because Federal order reform and consolidation became effective January 1, 2000, making such comparisons unproductive.

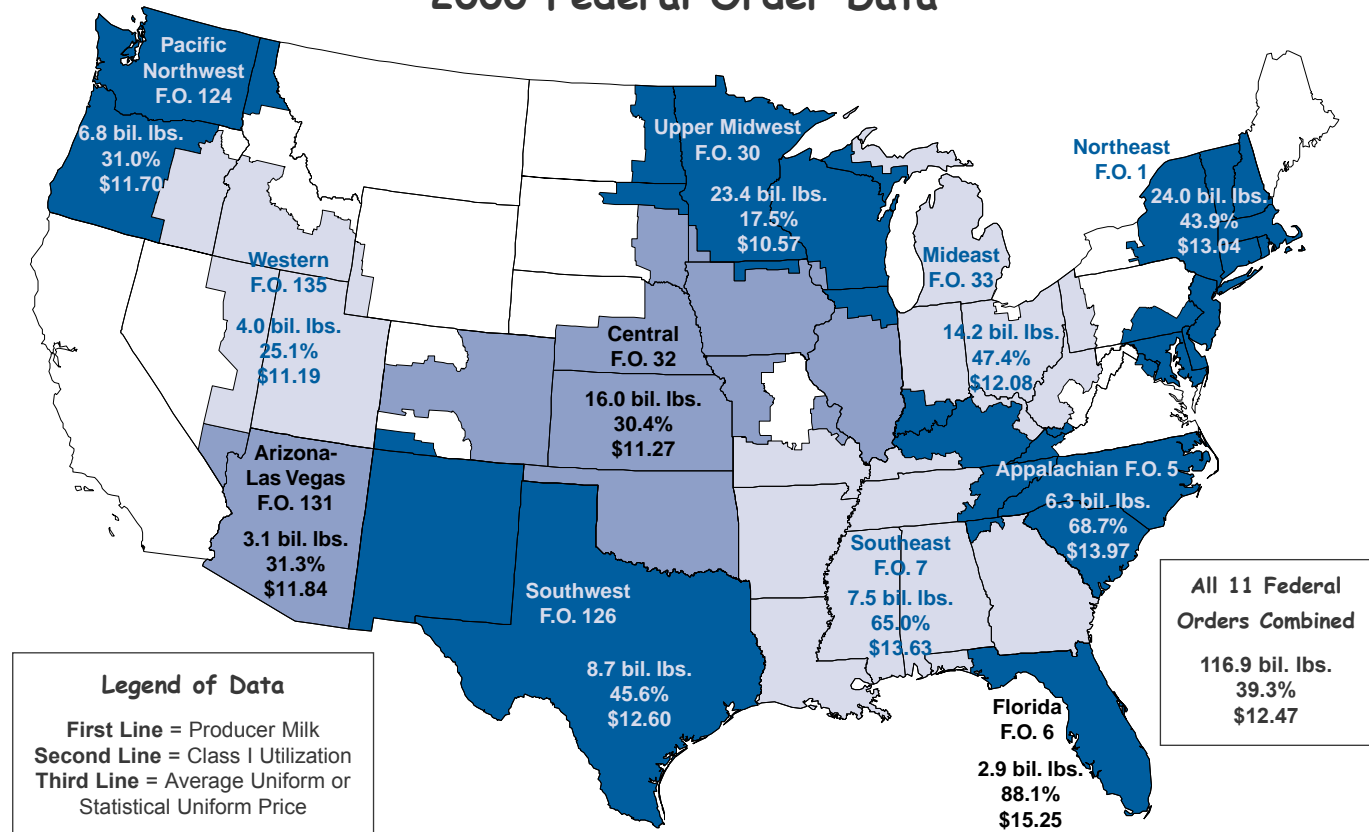

Producer milk in 2000 for all Federal orders combined totaled 117 billion pounds. Class I producer milk for all Federal orders totaled 46 billion pounds, or 39% of producer milk. Class I use ranged from 17% in the Upper Midwest Order to 88% in the Florida Order.

The simple average uniform price for all Federal orders combined for 2000 was \$12.47 per cwt. The average uniform price ranged from \$10.57 in the Upper Midwest Order to \$15.25 in the Florida Order.

2000 Federal Order Data

USDA Changes CCC Purchase Prices for Dairy Products

The U.S. Department of Agriculture recently announced that the Commodity Credit Corporation (CCC) purchase prices for butter, cheese, and nonfat dry milk (NFD) bought under the Dairy Price Support Program have been adjusted.

The Agriculture, Rural Development, Food and Drug Administration, and

Related Agencies Appropriation Act, 2001, extended the price support program through calendar year (CY) 2001 at the 2000 support price of \$9.90 per cwt. for milk at 3.67% butterfat.

In addition, USDA recently announced that purchase prices for butter, cheese, and nonfat dry milk were adjusted as shown below in order to reflect the new

pricing formulas under the reformed Federal milk marketing orders. The purchase prices of butter and nonfat dry milk were adjusted in proportion to their contribution to the milk price. Therefore, there is no change in the butter / nonfat dry milk relationship.

The new purchase prices were effective January 16, 2001.
