Recap of Federal Order Data for 2019

The table to the right and the map below summarize data for all Federal milk orders for 2019. Some comparisons are also made to data for 2018.

California became a Federal milk order in November 2018. Consequently, the 2019 total numbers are not completely comparable with the 2018 numbers.

Producer milk in 2019 for all 11 Federal orders combined totaled 156.5 billion pounds, up from 141.7 billion in 2018. However, removing the producer milk for California, the 2019 total would have been 3.9% below 2018.

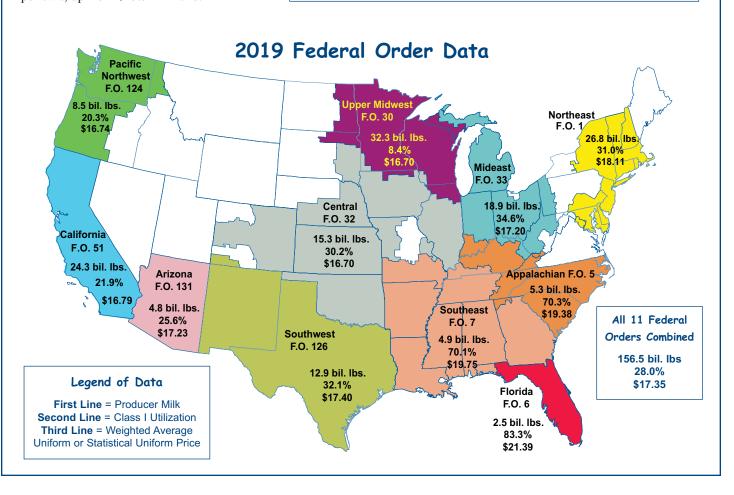

Class I producer milk for all 11 Federal orders in 2019 totaled 43.9 billion pounds, or 28.0% of producer milk. Total Class I pounds for all Federal orders in 2019 increased by 7.1% from the previous year because of the California Order. Without the California Class I milk, there would have been a decline of 3.6% from 2018 to 2019.

The weighted average uniform price for all Federal orders combined for 2019 was \$17.35 per cwt., up from \$15.51 in 2018.
