## Milk Hauling Charges -- May 2023

The Upper Midwest Order recently released a staff paper prepared by Dr. Areerat Kichkha, an agricultural economist on staff. Staff Paper 25-01, entitled *Milk Hauling Charges in the Upper Midwest Marketing Area - May 2023* is available at:

<https://www.fmma30.com/StaffPapers/StaffPaper--25-01.pdf>.

The study, which is summarized in this article, analyzes hauling charges based on state, county, and producer size groups for May 2023. Payroll data for the 8,822 producers who were associated with the Upper Midwest Marketing Order during the month were examined.

### Hauling Charges for the Market

The weighted average hauling charge for producers on the Upper Midwest Order in May 2023, as shown in *Table 1* on Page 3, was 42.02¢ per cwt., up from 41.53¢ in May 2022. Hauling charges have increased each year since 2015, with the exception of 2020 when they took a slight dip.

### Hauling Charges by State

The Wisconsin weighted average hauling charge of 39.15¢ per cwt. was 2.87¢ below the market average, while the

Minnesota weighted average of 38.01¢ was 4.01¢ below the market. These two states supplied 78.6% of the milk on the market in May 2023, but accounted for 72.6% of total hauling charges.

The Michigan UP has the highest simple average hauling charge. The state also has a low number of farms, the longest distance from high demand areas, and less handler competition. Minnesota, in contrast, has the lowest simple average hauling charge, with a high number of farms in close proximity to high demand areas.

### Hauling Charges by Size Range

The study indicated that as a producer's milk volume increases, the average hauling charge per hundredweight decreases. This can be seen in *Table 2* on Page 3.

One factor responsible for this is that many Upper Midwest handlers charge a fixed hauling dollar value to dairy producers, regardless of volume of milk delivered. Therefore, as the producer's production increases, the hauling charge per hundredweight will automatically decrease. With the information we have, the dollar impact cannot be isolated.
